## Key to a better tomorrow? Better choices today. We're planting change for a better tomorrow and set ambitious targets to hit.

BY END 2025 END 2026

We started the transition to regenerative agriculture with our soy protein supplier in Serbia in 2022.

Our support to farmers to grow soy protein with regenerative practices equaled to **70%** in 2024 and will equal **75%** of the soy protein volumes we use in 2025.

Our ambition: grow our support to an equal of **78%** of the soy protein volumes we use

**100%** of the soy protein used in all our products\* is European sourced

Exploring our packaging journey with the goal of having less virgin plastic packaging in place.

PACKAGING JOURNEY

Our packaging is designed for recycling.

FACTORIES

100% renewable electricity in our factories in Czech & Serbia in Europe
